

promoting engagement, developing knowledge, providing opportunity

Auburn Day School is Alabama's STEM (Science, Technology, Engineering, Mathematics) Preschool. Our concept-based curriculum engages young learners offering hands-on experiences in STEM, Language and Arts each day. STEM Camps are also offered around holidays and during the summers for preschool and young elementary students. At Auburn Day School, children are challenged to make connections between their world and new understandings, to make comparisons, to reflect on their learning, and to create new things. We promote questions, focus on the process, and respect all opinions and ideas. Our goal is to ensure that every child is joyfully gaining new knowledge, understandings, and skills each day.
