

Butterfly Life Cycle Song

(sung to the tune of My Fair Lady)

A butterfly lays an egg, lays an egg, lays an egg.

*A butterfly lays an egg
as part of its life cycle.*

*A caterpillar hatches from the egg, hatches from the egg,
hatches from the egg.*

*A caterpillar hatches from the egg
in search of food to eat.*

A caterpillar chews on leaves, chews on leaves, chews on leaves.

A caterpillar chews on leaves to get some energy.

Now he rests in a chrysalis, in a chrysalis, in a chrysalis.

Now he rests in a chrysalis, and he becomes a butterfly.
