

#STEMstroll: Habitats

AUBURN
DAY SCHOOL

alabama's first STEM preschool

Day 1:

Explore human habitats! A habitat is a natural home for a plant and animal. Humans have added shelters to the habitats they've chosen. Some are homes, some are apartments, some are homes on wheels. How many human homes do you see on your stroll today? On your #STEMstroll Upload pictures on FB and Instagram @auburndayschool #STEMstroll #AOHomes #Habitats

Day 2:

Explore maps! Our video about habitats includes a globe and maps of Alabama. Walk around your house today and make a map of your favorite room. Upload a picture of the favorite room map on FB and Instagram @auburndayschool #STEMstroll #ALmaps

Day 3:

Who's scat! An experience shown on our habitat lesson involves looking for worms and creating a worm habitat. Finding worm scat is one way to track down worms for your habitat. Can you find scat in the dirt while strolling today? Upload a picture of scat on FB and Instagram @auburndayschool #STEMstroll #scat

Day 4:

Identify animal habitats! We can identify an animal's habitat by the homes they build there. A nest is a home for a bird. A hive is a home for a bee. Hutches are homes for rabbits and a hole is a home for a snake. When you see any animal homes on your stroll today, take a picture of them and upload one or two to FB and Instagram @auburndayschool #STEMstroll #animalhabitats

Day 5:

Help your habitat! Before your stroll today, find some gloves and a recycled grocery bag. Look for litter on your stroll and see if you can help your habitat by picking up the litter and placing it in your bag with a gloved hand. Share a picture of your bag on FB and Instagram @auburndayschool #STEMstroll #helpyourhabitat #don'tbealitterbug
