

Supplies

1. 5 Different Toys
2. Ordinal Number Cards

Directions:

1. Gather 5 different toys or items from your home.
2. Look for similarities and differences in the group.
3. Using the differences, think of how you will decide what position or order your items should line up in your parade. (for example: tallest to shortest, shortest to tallest, heaviest to lightest)
4. Lay the ordinal number cards in front of the items and name them as 1st, 2nd, 3rd and so on.
