

Match and Build Patterns

Supplies:

1. Duplo or Lego Blocks

Directions:

1. Pick out two Duplo blocks of different colors and stack one on top of the other.
2. Make several copies of the first stack.
3. Place the stacks in a row and have the child observe to make sure all the stacks look the same. The pattern will not work if there are any mismatching pieces. Make adjustments if needed.
4. Verbalize the pattern by saying the color of each block. Verbalizing the pattern is another way to help them learn!
5. Connect the blocks to lengthen your pattern.
6. To increase difficulty, add more blocks to the beginning stack. As the child understands patterns, have them create the first stack and continue the activity independently.
