## STEM Experiment

### **Rainbow Celery**

#### Materials:

- Celery Stalks
- 2-4 Clear Glass Cups
- Water
- Food Coloring

#### Directions:

- Separate a stalk of celery from the leaves. You may need to cut a bit off the bottom to make sure some of the fresh inside is showing.
- Pour 2 cups of water into the glass.
- Put a few drops of food coloring into the water and stir to incorporate.
- Place one stalk of celery into the colored water with the exposed side submerged.
- Watch the celery over the next several hours and days to see what changes you observe.
